## Sentry Equipment Corp Moves into New Headquarters Building

**Oconomowoc, Wisconsin** (August 30, 2007) – Sentry Equipment Corp, the leading worldwide supplier of sampling components and systems, completed the move into its newly-constructed headquarters building located in the Pabst Farms Commerce Centre in Oconomowoc. Sentry Equipment is a well-known international manufacturer of sampling equipment and sampling solutions for the power generation and process industries. The need for a new building arose from rapid growth which rendered their former building too small for all the equipment and personnel needed to support the organic and acquisition-based growth. Sentry had acquired Bristol Equipment Company in 2003 and Gustafson Automatic Samplers' product line in 2005. Today the company employs over 120 people and is continue to fill new positions made possible by the growth in sales.

The new custom-manufactured building incorporates 51,000 square feet of manufacturing and office space. Sentry chose to integrate cutting edge lighting technology using newly developed LED lights (interior and exterior) as part of its environmentally-friendly design for the building. Sentry Equipment researched the use of high efficiency LED lighting and discovered the tremendous payback and long-term savings that the LED lights would offer. Michael Farrell, Sentry Equipment's CEO, is committed to the environment and wanted to make business decisions that were in line with environmentally friendly business. For this reason Sentry Equipment built the facility to meet green standards.

Sentry Equipment Corp is an employee-owned company that has been supplying engineered solutions since 1924. Since Sentry's acquisitions of Bristol Equipment Company and Gustafson Automatic Samplers, Sentry has become the company with the broadest range of sampling solutions and the most sampling expertise in the world.
